# DEVENDRA KUMBHARE

devendrakumbhare005@gmail.com | +91-9021185435 | Portfolio | LinkedIn | GitHub | LeetCode

## SUMMARY

Artificial Intelligence undergraduate with hands-on experience in Machine Learning, Data Analytics, and Full-Stack Development. Proficient in Python, SQL, and Scikit-learn, with practical experience building AI-powered applications and predictive models. Strong foundation in Data Structures and Algorithms, problem-solving, and software development through academic projects and internships. Seeking opportunities in Software Engineering, AI/ML Engineering, or Data Analytics to develop innovative, data-driven solutions.

## SKILLS

**Languages:** C, Python, Java (Basics), SQL
**Web Technologies:** HTML5, CSS3
**Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, FastAPI
**Developer Tools:** Git, GitHub, Visual Studio Code, Cursor AI, Microsoft Excel
**Core Competencies:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Problem-Solving, Machine Learning, Data Analysis

## EDUCATION

**Guru Nanak Institute of Engineering & Technology** — Nagpur, India
*B.Tech in Artificial Intelligence – CGPA (Up to 6th Sem): 6.8* — 2023 – 2027

**Jawahar Junior College** — Nagpur, India
*HSC (Class XII) – Aggregate: 62.00%* — 2021 – 2022

**Rajendra High School** — Nagpur, India
*SSC (Class X) – Aggregate: 80.40%* — 2020

## EXPERIENCE

**Deloitte** — **Data Analyst**

- Analyzed real-world business datasets to identify anomalies, trends, and risk indicators as part of Deloitte ' s forensic analytics case study.
- Cleaned, transformed, and validated raw data using Excel (pivot tables, filtering, conditional formatting) to support accurate decision-making.
- Designed an interactive Tableau dashboard to visualize KPIs, highlight suspicious patterns, and present insights in a client-ready format.

**Oasis Infobyte** — **Python Programmer**

- Developed a BMI (Body Mass Index) Calculator using Python, implementing formula-based computation to classify users into categories such as Underweight, Normal, Overweight, and Obese.
- Applied clean coding practices, conditional statements, and user-input handling to build an interactive command-line Python application.
- Enhanced practical programming skills by completing real-world internship tasks and understanding how Python can be used to solve health-related computational problems.

## PROJECTS

**Floor Planning Using Ai** — **June 2026 - Present**

- Designed and developed an AI-driven floor planning platform that automates residential floor layout generation.
- Implemented machine learning and computer vision techniques to generate optimized layouts based on user inputs and predefined architectural constraints.
- Developed responsive frontend interfaces, backend APIs, and database integration for efficient floor plan management and visualization.

**EduTech: Student Academic Risk Prediction** — **Feb 2026 - May 2026**

- Built a machine learning system to predict academic risk and student performance trends.
- Applied data preprocessing, feature engineering, and classification algorithms on educational datasets.
- Developed predictive models for early detection of at-risk students using academic and behavioral indicators.
- Created analytical visualizations to support educational insights and intervention strategies.

## CERTIFICATES

- Oasis Infobyte Internship Certificate
- Central India Hackathon 2.0 Participation Certificate
- Deloitte Virtual Internship in Data Analyst
